What is White-tec

Devon and Devon bath tubs are made of a composite material specifically designed to meet the highest quality, technology and environment standards.

The highly functional solid surface of is uniform, non-porous, smooth and hygienic, does Not turn yellow over time, withstands daily wear and is UV resistant. White Tec is completely non-toxic, inert, hypo-allergenic and flame-retardant. It can be restored, repaired and recycled and is, therefore, environment friendly. Its exceptional characteristics are the result of attentive selection of the raw materials used. Its main component is a natural mineral filler, aluminium tri-hydrat (ATH), a mineral derived from bauxite with which it is alloyed with a low percentage of acrylic polymers and polyesters.

How to clean

Daily cleaning:

If there are no stubborn or persistent stains, clean with a coarse sponge dipped only in water or mild detergents to restore the beauty of your D&D bath tub.

Thorough cleaning:

to eliminate stubborn stains, apply abrasive detergents with a coarse sponge. If the stain persists or in the case of deep scratches, use fine-grain sandpaper (provided) to smooth the surface and then rinse thoroughly with water using the soft side of the sponge.

Although the White-tec material is compact and non-porous with good stain resistance, it is advisable not to use very aggressive detergents and cosmetics such as acids and acetone.
